## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election without traverse of Species A: Figs. 5-9 (claims 1-19) in the reply filed on 10/13/2005 is acknowledged.
2. Claims 20-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/13/2005.

### *Drawings*

3. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
4. The drawings are objected to under 37 CFR 1.83(a) because they fail to show element (107) as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the

Art Unit: 3754

immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

5. The disclosure is objected to because of the following informalities: on page 7, line 2, "a passage 129" should be --the lower part 129--.

Appropriate correction is required.

### ***Claim Objections***

6. Claim 15 is objected to because of the following informalities: in claim 15, line 13, the claimed limitation "said housing" lacks antecedent basis in the claim. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3754

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by Garcia et al. 6,371,337.

Garcia et al. disclose a bottle (1), which comprises a body as seen in Figure 1, thin walls being formed around the opening (see Figure 1 for location of the thin walls, a thick section (10) spaced below the opening and forming an undercut (see Figure 1 for the location of the undercut), and a crimp surface formed on the outside of the neck (see Figure 1 for the location of the crimp surface).

#### ***Allowable Subject Matter***

9. Claims 1-13,15-19 are allowed.

#### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Jumel et al. 5,271,532, Knickerbocker 4,252,507, Bougamont et al. 6,634,872, Garcia et al. 6,527,149, Jouillat 4,944,432, Petit 6,446,841, Jouillat et al. 5,105,994, Fuchs 4,762,475, Brunet et al. 4,930,999, Tada 4,524,888 and Jouillat et al. 5,566,865 disclose other types of housing cap for securing a dispenser.
